License Management

Configurations · https://codifycore.com/docs/license-management/

What this does

License Management authenticates your purchase of the Pro extension. Activating a valid license key unlocks all advanced features (such as Direct Meta CAPI, Event Logs, and Diagnostics) and registers your site to receive automatic plugin updates directly from the CodifyCore servers, ensuring your tracking remains secure and up to date.

How to configure

1. Navigate to your WordPress admin dashboard.
2. Go to **FluentCart > CodifyCore sGTM**.
3. Open the **License** tab.
4. Enter your purchased license key into the provided field.
5. Click **Activate License**.
6. A success message will appear, and the Pro features will be immediately unlocked across the other settings tabs.

Dependencies

- **FluentCart** plugin must be installed and active.
- **CodifyCore sGTM for FluentCart** (Free) plugin must be installed and active.
- **CodifyCore sGTM for FluentCart Pro** extension must be installed.
- A valid CodifyCore Pro license key.
