Master Switch & Environment Mode

Configurations · https://codifycore.com/docs/master-switch-environment-mode/

What this does

The Master Switch allows you to globally enable or disable all server-side tracking functionality with a single toggle. The Environment Mode lets you switch between a Staging/Test Mode (for safe testing of your tracking setup) and a Production Mode (for live tracking of real customers).

How to configure

1. Navigate to your WordPress admin dashboard.
2. Go to **FluentCart > CodifyCore sGTM**.
3. Open the **General** settings tab.
4. For the **Master Switch**, select either "Enable Server-Side Tracking" or "Disable".
5. For the **Environment Mode**, select either "Staging / Test Mode" or "Production Mode".
6. Click **Save Changes**.

Dependencies

- **FluentCart** plugin must be installed and active.
- **CodifyCore sGTM for FluentCart** (Free) plugin must be installed and active.
